Direct Hay Weighted Average Report for week ending 6/25/2021

Volume			
	This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report: New crop prices are mostly firm. Temperatures have been near average across most of the state, but above average in the Panhandle. The Southern region received some moisture from Hurricane Claudette. According to the Texas Crop and Weather report, good hay yields were reported in the Central and East. First cutting is underway in the South moisture permitting, some low lying fields are still to wet to get equipment in. Pastures look good over most of the state, but without moisture soon the Panhandle and West are expected to degrade quickly.

Due to limited sales and price changes this report will be released bi-weekly until more volumes of hay is moving.
*** The next report release will be July 8th***

Central						
Hay (Conventional)						

Alfalfa - Premium/Supreme (Ask/Per Ton)

	Qty	Price Range	Wtd Avg	Freight/Use	Description	Crop Age
