Direct Hay Weighted Average Report for week ending 5/27/2022

Volume		
This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report: Hay prices remain mostly firm to 10.00 higher in all regions. Demand for hay remains very good as moisture deficits have been recorded in much of the state. However, some beneficial rains fell across much of the state over the last week ranging from a few tenths to 2 and a half inches. Most of first cutting is up in South Texas. However, 64 percent of the state is still listed in the D0-D4 category, but an 8 percent increase was noted extreme to exceptional category.

Due to limited sales and price changes this report will be released bi-weekly until more volumes of hay is moving.

*** The next report release will be June 10th***
