Direct Hay Weighted Average Report for week ending 7/8/2022

Volume		
This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report: Hay prices remain mostly firm to 10.00 higher in all regions. Hay demand remains very good. Hotter than average temperatures accompanied by high winds and limited moisture has hurt hay yields in all regions. Stock piles of last years hay are dwindling and pasture conditions across much of the state are rated in fair to very poor condition. As a result, livestock producers are feeding supplemental hay and beginning to cull deeper into there cow herds and sell off calves earlier than normal. If the weather pattern continues it is looking like hay supplies will be very tight come fall and into winter. Hay from outside the state will continue to move in, but continually increasing freight rates are going to have an impact on the end cost to producers.

Due to limited sales and price changes this report will be released bi-weekly until more volumes of hay is moving.

*** The next report release will be July 22nd***

Central						
Hay (Conventional)						

Alfalfa - Premium/Supreme (Ask/Per Ton)

	Qty	Price Range	Wtd Avg	Freight/Use	Description	Crop Age
Large Square 3x4		350.00-400.00		Delivered
