Issue: TX-CW3522

Weekly Summary for September 12 - September 18 Released: September 19, 2022

Areas of the Plains and the Trans Pecos received from trace amounts to one inch of precipitation. Drought conditions ranged from none to exceptionally dry, with isolated parts of South Central Texas, the Southern Low Plains, and the Blacklands being the driest. There was an average of 6.7 days suitable for fieldwork, up from 6.1 days last week.

Small Grains: On the Plains and Edwards Plateau, producers continue to plant winter wheat for fall grazing. In other areas of Texas, farmers are working ground in preparation to plant in the coming weeks.

Row Crops: Producers in the Northern High Plains are harvesting corn for silage. Cotton harvest continued in southern areas of the state while producers in the north waited for bolls to open. Cotton condition was mostly poor-to-fair statewide.

Livestock, Range and Pasture: Supplemental feeding continued across the state. Overall, reporters say pastures continued to green from rain received in previous weeks with the exception of some areas in the Blacklands and much of the Plains. Range and pasture conditions were rated 52 percent fair to poor.

Crop Progress

Stage	Percent of Acreage			
	Current Week	Previous Week	Previous Year	5 Year Average
Corn				
Dented	98	94	97	96
Mature	85	81	84	79
Harvested	68	64	69	66
Cotton				
Bolls Opening	55	50	41	43

Crop Condition

Crop	Percent of Acreage					Index ¹	
	Excellent	Good	Fair	Poor	Very Poor	2022	2021
Corn	3	14	31	23	29	42	78
Cotton	1	14	29	32	24	40	77
Peanuts	0	32	52	16	0	64	75
Rice	22	29	48	1	0	79	85
Sorghum	1	16	41	29	13	48	79
Soybeans	0	12	31	42	15	41	72
Range and Pasture	6	21	29	23	21	50	53

¹ The formula for the condition index is $I = (5V + 25P + 60F + 90G + 110E)/100$ where I = crop condition index and V, P, F, G, E = percentage of crop rated very poor, poor, fair, good, excellent.
