Direct Hay Weighted Average Report for week ending 11/11/2022

Volume		
This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report: Hay prices are steady to firm in all regions. Hay demand is picking up as the majority of the pastures in the state are rated from average to very poor. Additionally, a cold front is moving into the area which will increase supplemental livestock feeding. Hay is still moving into the state from bordering states, but trucking and freight rates continue to be a struggle for producers and have had large impacts on delivered prices. According to USDA-NASS, winter wheat planting across the state reached 88 percent, up 5 points from the previous year. Winter wheat emergence has reached 67 percent, up 5 points from the previous year. Although rains have been scarce they've been pretty timely for the winter wheat crop thus far. The productivity of winter wheat crop will be very important for livestock producers as forages are predicted to be short this year.

Due to limited sales and price changes this report will be released bi-weekly until more volumes of hay is moving.

*** The next report release will be November 25th***

Central						
Hay (Conventional)						
Alfalfa - Premium/Supreme (Ask/Per Ton)						
	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
