Direct Hay Weighted Average Report for week ending 2/10/2023

Volume		
This Week	Last Reported ()	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report: Hay prices remain firm in all regions. Hay demand is very good across the state. Cooler temperatures accompanied by some snow in the West, Panhandle, and Northern regions and spotty showers in the South, Central and East moved across the state this week. Hay movement remains steady in all regions as supplemental livestock feeding continues throughout the winter months. According to David Anderson, Ph.D., AgriLife Extension economist, Bryan-College Station Texas pastures produced the lowest amount of hay since 2011. Anderson also stated, U.S. hay production followed the Texas trend. According to the December 2022 hay stock reports, the 71.9 million tons of hay on hand was the smallest amount since the USDA began tracking forage supplies in 1973. Texas hay supplies were 37% below the December 2021 report and other Plains states like Oklahoma, Kansas and Nebraska were all at least 30% below their stocks last year. As a result, livestock producers are continuing to cull deeper into their herds to avoid feeding excess amounts of hard to come by, high priced forages.

Due to limited sales and price changes this report will be released bi-weekly until more volumes of hay is moving.

*** The next report release will be February 24th ***

Central						
Hay (Conventional)						

Alfalfa - Premium/Supreme (Ask/Per Ton)

	Qty	Price Range	Wtd Avg	Freight/Use	Description	Crop Age
Large Square 3x4		400.00-425.00		Delivered		

Bermuda Grass - Premium (Ask/Per Ton)

	Qty	Price Range	Wtd Avg	Freight/Use	Description	Crop Age
