Direct Hay Weighted Average Report for week ending 6/30/2023

Volume		
This Week	Last Reported ( )	Last Year

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to the last report: Hay prices are mostly steady in all regions. Trading activity was mostly inactive on very limited demand. Contracting for summer and fall hay hasn't started taking place yet, only a few small trades have been reported. Pastures in most regions are still adequate from late spring and summer rains. However, extreme heat in the Panhandle, West, North, Central and South are beginning to take a toll on top soil moisture levels. Crops and pastures are still in good shape but if the extreme heat and limited moisture continue they are at a risk of burning up. First cutting of Alfalfa and Grass hay has been cut, however untimely rains in the majority of the regions has a good portion of the crop being marketed as commercial cow hay.

\*\*\*Due to limited sales and price changes this report will be released bi-weekly until more volumes of hay is moving.\*\*\*

\*\*\* The next report release will be July 14th, 2023\*\*\*

Central						
Hay (Conventional)						

**Alfalfa - Premium/Supreme (Ask/Per Ton)**

	Qty	Price Range	Wtd Avg	Freight/Use	Description	Crop Age
