

## **Ernesto José Sequeira Enríquez**

Camoapa, Nicaragua

Ernesto is an agronomist with extensive academic training and field experience in agricultural and livestock production. A graduate of EAP Zamorano in Honduras with a degree in Agronomic Engineering, Ernesto focused his research on pasture rotation systems and bovine supplementation strategies in Nicaragua.

He has pursued advanced training in Brazil and the United States, completing specialized courses in animal reproduction, pasture management, and sustainable livestock systems.

Ernesto's professional experience spans both consultancy and hands-on roles. He has led practical training programs in Brazil and now manages his family's cattle operation in Camoapa, Nicaragua.

Since 2020, he has also provided agricultural consulting services, helping producers improve efficiency through strategic planning, optimized pasture systems, and sustainable animal nutrition.
